L2: Entry 1 of 11

File: USPT

Aug 3, 2004

DOCUMENT-IDENTIFIER: US 6771193 B2

TITLE: System and methods for embedding additional data in compressed data streams

Brief Summary Text (4):

Data compression generally involves converting data to a format that requires fewer data units (e.g., bits). Data compression is widely used to compress various types of computer files. For example, ARC and ZIP are two popular file compression formats. Data compression is also used in backup utilities, spreadsheet applications, and database management systems.
